Union Code of Conduct

We will not criticize any union colleague except to the individual directly.

If any union colleague is being criticized in our presence, we will professionally approach the criticism and ask that it stop.

We will not participate in any conversations with management that criticizes, or negatively speculates about any union colleague.

We will settle our differences with colleagues within our union.

We will engage in discussions, offer others every opportunity and listen to their constructive argument and respect the minority's viewpoints, but we will freely observe and support the majority mandate of our union.
